About the National Archives

KNOW YOUR RECORDS
National Archives and Records Administration

The National Archives and Records Administration (NARA) is the nation's record keeper. Of all the documents and materials created in the course of business conducted by the United States Federal government, only 1%–3% are determined permanently valuable. Those valuable records are preserved and are available to you, whether you want to see if they contain clues about your family's history, need to prove a veteran's military service, or are researching an historical topic that interests you.

What's New at FamilySearch

John de Jong

FamilySearch provides free online access to over 2,079 record collections with 1.2 billion images, 5.36 billion searchable names, research assistance, genealogical education, community forums, and an ever-expanding knowledge base (Wiki). This session will explore the many resources available online and at your local Family History Center.

Presenter's Biography

John de Jong

**FamilySearch
International**

John's current responsibility at FamilySearch International is to lead the team responsible for negotiations with all archives in North America. He also has personal responsibility to collaborate with U.S. Federal agencies including the National Archives and Records Administration (NARA). Additionally, he negotiates agreements with archives in Maryland, West Virginia, Ohio, Indiana, and the District of Columbia to digitize their genealogically significant records and make them available online for patrons to find their ancestors for free at www.familysearch.org.

John's personal family history research is focused on the Netherlands, seeking to learn more about his family and their origins. He is also helping his wife with her family's genealogy, and was able to find out more about several relatives who were Civil War soldiers, and whose records and some pictures were found at the National Archives.
